(54) CONTAINER CRANE

COPYRIGHT: (C)1998,JPO

(57) Abstract:

PROBLEM TO BE SOLVED: To optimize the loading operation of a container crane equipped with a junction table.

SOLUTION: A container crane 1 is to hang up a container and down and load it in a container ship or unload therefrom using a trolley moving on a crane girder and a spreader hung down at the trolley, wherein the first 17 and the second traverser 26 are installed on the crane girder 8 movably, and the first trolley 9 movable to make hand-over of container 21 between the ship 22 and the first traverser 17 is installed on the crane girder 8 on its side nearer the sea than the first traverser 17, while the second trolley 12 movable to make hand-over of container 21 between the second traverser 26 and a land facility is installed on the crane girder 8 on its side nearer the land than the second traverser 26, and on either traverser 17 or 26, a container transfer device 27 is furnished to hand over the received container to the traverser as the mating party.
